

Professional and diligent, all our work is undertaken by members of IEMA and our auditors are IEMA registered.

The background of the slide is a photograph of an industrial facility at night. The scene is illuminated by various lights, creating a blue and yellow color palette. Smoke or steam is rising from several chimneys. The facility's structures, including pipes and tanks, are reflected in a body of water in the foreground.

environmental
assessment & auditing

Set up in 2007, Environmental Assessment & Auditing is an environmental consultancy based in the heart of Aberdeen city, proudly providing a wide range of environment services to industry.

Professional and diligent, all our work is undertaken by Chartered Environmentalists, who are members of Institute of Environmental Management & Assessment (IEMA) and IEMA registered auditors. This means we have demonstrated our understanding of the principles and practices of environmental management & assessment, gained as environmental practitioners over the last ten years.

With UK-wide and international experience in oil & gas, manufacturing and construction sectors, our services include, but are not limited to:

- + **Office based, site based and offshore auditing**
 - for compliance with environmental legislation
 - for compliance with your company's environmental management system
 - for identification of best practice
 - for the identification of areas where the scope for continual improvement exists
- + **Support during project development, construction and operation phases**
- + **Regulator and stakeholder consultation**
- + **Environmental awareness and environmental hazard workshops**
- + **Environmental permitting and consent applications**
 - auditing for compliance with permits
 - annual regulatory reporting
 - non compliance investigations
- + **Environmental management systems**
 - developing policies, plans and procedures
 - auditing for compliance with legislation and company procedures
 - presenting environmental awareness and training material to all levels of business
- + **Environmental impact assessment**
 - site and option selection
 - screening and scoping studies
 - liaison with stakeholders
 - project managing complex EIA
- + **Carbon foot printing**
- + **Radiation Protection Supervisor services**
- + **On call offshore emergency response services**

If you don't see the service you require listed above, please contact us and we'll be happy to discuss how we can help, or alternatively provide advice on who within the Environmental community may be able to assist.
